

Energy procurement

Take control of your energy costs.

We help organisations take control of their energy costs by leveraging our market expertise. We will help you select the supplier, the contract length and type of contract, including fixed, flex and renewable. We can prepare all the options, comparisons, and risk assessment for you with an analysis of what is right for your energy needs and budget.

Energy can be a significant expenditure, especially during periods of high market volatility. Securing the best value contracts is crucial to protect your organisation from any unforeseen market changes that can drive wholesale prices upwards.

The type of contract you choose can affect what you'll pay in the long term. But it can be difficult to compare prices when there is an endless product and supplier choice. Gathering the information, assessing your options and forecasts and comparing different products to weigh up the costs and potential changes to costs throughout the contract period takes time and expertise.

We will provide our expertise and experience to help you select the supplier, the contract length and type of contract that supports both your energy needs and budget.

We can prepare all the options, comparisons and risk assessment for you with an analysis of what is right for your organisation and your energy needs.

Additional services: A holistic end-to-end energy service from procurement to net zero and everything in between

Zenergi's breadth of service offering means you can access all the energy services you need in one place.

Bill validation ensures that readings reflect your actual consumption and that your rates are correct. Contract and supplier management ensures all supplier queries are dealt with on your behalf. Energy efficiency services help you understand and act on your energy saving opportunities. You can remain on track with any energy compliance relevant to your organisation and get the support you need to access funding and install the measures needed to meet your net zero and sustainability ambitions.

Whatever level of service you need, we are here to support your organisation's journey towards more sustainable energy.

Key benefits of Zenergi's energy procurement service

- Energy experts conduct thorough market forecasting to recommend the most suitable contracts for your needs
- Choose from a range of contracts, including fixed, flex and green energy
- Secure favourable rates that protect you from sharp spikes in the market
- Better visibility of costs and increased level of control to allow for improved budgeting
- Greater choice of pre-approved suppliers that are vetted and benchmarked
- Streamline your accounts by aligning end dates across your sites
- Consumption data available in online portal to allow for monitoring, understanding, and reducing your energy use
