

Siteworks

Access specialist expertise to deliver your projects on time.

With in-depth knowledge of complex siteworks processes, we can oversee any size of project, from single supply to multiple services, liaising with distribution networks, suppliers, and meter operators. With a focus on communication, the team collaborates to ensure projects are delivered on time and customers are fully informed throughout.

Whatever your location or operational requirements, whether you need gas or power meter installation for a single site or whole development, we have the expertise to co-ordinate and manage your energy installations and connections.

If you're planning a new building, extension or refurbishment, our mechanical and electrical design engineers are here to help every step of the way, ensuring the energy efficiency of your build both now and for the future.

Once the siteworks have been completed, we can source the most cost-effective supply contracts to deliver the best value for your needs.

Siteworks expertise

- Full siteworks project management
- Expert industry knowledge
- Close links with network operators and multi-utility Contractors (both DNO and IDNO), suppliers and meter operators
- Meeting tight timescales
- Approachable and friendly service
- Close attention to detail
- Independent utility brokers
- Full range of utility management services

Projects

- Multi utility connections – electricity, gas, water and telecoms
- New meter supply connections – electricity, gas and water
- Existing supply disconnections – electricity, gas, water and telecoms (including site clearances for demolition purposes)
- Supply upgrades – electricity (including substations), gas, water and telecoms
- Supply diversions – electricity, gas, water and telecoms
- Utility network reinforcement
- Utility live/dead supply assessments and GT1 surveys
- Load monitoring of existing consumption
- Electric Vehicle charging – feasibility studies and implementation
- Automatic meter reading (AMR) – feasibility studies and implementation

Thank you for the help in getting the school back on the mains gas. It has been a long and rather complicated process, but Zenergi's help and support has made the whole process so much easier! You have always been available and approachable, and having access to experts such as yourselves who have kept us updated on progress and actually wanted to help is one of the reasons we choose to work with Zenergi.
