

Brigshaw Learning Partnership

Brigshaw Learning Partnership achieves energy savings of more than 28% under a fully managed energy service.

Zenergi has been selected as the energy partner for Brigshaw Learning Partnership. Zenergi was awarded the energy contract for each Trust following rigorous tender processes within the Institute for School Business Leaders (ISBL) OJEU-compliant energy framework that Zenergi facilitates.

Zenergi is an approved partner to ISBL and manages energy procurement, billing and related energy services for more than 3,000 schools and colleges nationally. Competitive pricing; experience and knowledge of energy for schools; coupled with a trusted partnership approach supported the award of the contracts.

Brigshaw Learning Partnership was procuring its energy as part of a Public Buying Organisation framework. Zenergi supported the Trust's exit from the framework with a 24-month contract that saved an estimated £18,000 (28%) per annum against its previous gas contract.

Fully managed energy service

Brigshaw Learning Partnership will benefit from Zenergi's full service, including invoice validation; access to a customer portal for visibility of energy usage to support accurate budgeting, along with regular commentary and recommendations from a dedicated account manager; and full support for any energy-related queries managed through to resolution with suppliers.

An end-to-end energy package

In addition to procurement for energy and water, the Trust can also access additional energy-related services as part of a complete end-to-end energy package. These services support schools to meet their compliance obligations, including Display Energy Certificates (DECs); Streamlined Energy and Carbon Reporting (SECR); and Air Conditioning Inspections (TM44).

Zenergi can also support schools to become more energy efficient, with audits that offer an understanding of energy use and identify opportunities to reduce consumption and associated costs; and help to unlock available government funding for energy efficiency and renewable energy projects.

£18,000

per annum saved (28%)
against previous gas contract

Brigshaw Learning Partnership moved from buying through a framework to a broker arrangement. We have made significant savings and are enjoying the added benefit services and advice from Zenergi.
