

# Business Mobile & Internet of Things (IoT)

Power your connected workforce with reliable mobile solutions and IoT connectivity.

The modern work landscape demands flexible and cost-effective mobile solutions for your employees, no matter where they work. We are a leading B2B mobile provider in the UK, partnering with the top networks (O2, Vodafone, EE, and Three) to ensure your business stays connected with confidence.

## Connecting your teams:

- **Tailored mobile solutions:** We collaborate with you to understand your business needs and create a plan that perfectly aligns with your organisation's requirements.
- **Flexible options:** Choose contracts and billing structures that fit your budget and size, whether you're a small team or a large corporation. Benefit from a single unified bill for all your services for simplified management.
- **Extensive tariff range:** Discover the ideal balance of data, minutes, and texts for each employee, ensuring their productivity and connectivity.
- **Dedicated support:** Our knowledgeable team is readily available to offer expert advice and troubleshooting – whenever and wherever needed.

## Simplified mobile management:

- **Mobile contracts:** We work closely with you to understand your specific needs and requirements. We then tailor a solution with a choice of mobile networks, all under a single, simple contract.
- **Mobile device management:** Take control of your mobile fleet remotely. Manage security policies, deploy essential applications, and remotely wipe devices if needed.

## Enhanced security:

- **Security features:** Protect your valuable data with encryption, password protection, and remote wipe capabilities.

## Uninterrupted connectivity:

- **4G/5G mobile broadband:** Stay connected with a reliable backup solution for situations where your primary broadband connection experiences downtime.

## Harness the power of IoT:

- **Unlock the potential of IoT:** We offer a range of mobile data SIMs and fixed IP data SIMs to empower you to leverage the Internet of Things (IoT). Our SIMs can be used to route data to any web-connected device, providing you with control and monitoring capabilities for your IoT devices from anywhere in the world.
- **Dedicated account management:** Benefit from a dedicated account management team that provides ongoing support and expert advice.
- **Tailored solutions:** We design IoT solutions that meet the specific needs of your organisation.
- **Flexibility:** Choose from a variety of contracts and enjoy a single bill for all your services.
- **Extensive choice:** Select from a comprehensive range of mobile tariffs and plans catering to businesses of all sizes.
- **Unbeatable value:** We offer the best value and range of services from the UK's leading mobile networks.
