

## Bill Validation

Identifying and rectifying  
thousands of incorrect  
bills every month.

# Every year many organisations unknowingly overpay for their energy and water by considerable amounts.

Mistakes are often made through estimated billing and incorrect contract charges. Catching these in house can be a time-consuming and costly activity.

This is where Zenergi helps.

Our Bill Validation service identifies any possible discrepancies in energy and water bills, ensuring the numbers are based on accurate usage data and guaranteeing the correct rates are being applied. Any discrepancies are queried with suppliers and followed through to resolution, with any incorrect payments returned to customers in full, providing full peace of mind.

Experienced Bill Validation and Query Resolution Specialists check thousands of bills every month for our customers, finding a significant number of them to be incorrect. Every incorrect bill risks major cost implications.

We review and calculate each component of the invoice, matching contract rates and consumption with invoice details, and ensure the correct VAT rates are being applied.

The service has made a huge difference to the budgets of many customers. Experience and expertise in the energy and water markets ensures that readings reflect your expected consumption and that your rates are correct.

Bill Validation data also helps in your journey towards net zero. Data captured in the process provides an understanding of your consumption to drive energy, water, cost, and carbon reductions, while supporting data collation for Streamlined Energy and Carbon Reporting (SECR), Energy Savings Opportunity Scheme (ESOS) and net zero strategies.

 Key features

- Unit rates checked against contract
- Standing charge checked against contract
- KVA charges checked against contract
- VAT checked against submitted forms
- Duplicate billing periods checked
- Meter reads checked against submitted reads

 Key benefits

- More informed and accurate budgeting and forecasting
- Highlights sites consuming below, or in excess of, contracted volume
- Identifies sites that need a meter read, to avoid over-billing
- Reduces administration costs and improves cash flow tracking
- Identifies half-hourly sites which exceed their capacity
- Accurate VAT reporting

Looking to get your budget in order?

We support with procurement and benchmarking.

 Water Procurement

Get on top of your water budget with our Water Procurement service. Providing water comparison quotes on a like-for-like basis with Bill Validation and benchmarking of your consumption to identify any potential inefficiencies or leaks.
