

## Business Mobile and Internet of Things (IoT)

Power your workforce with  
reliable mobile solutions  
and IoT connectivity.

# Navigating today's hybrid work landscape demands reliable and cost-effective mobile solutions for your employees, wherever they roam.

But it's not easy to identify which providers can best meet your evolving needs.

Our experts can help.

We are a leading B2B mobile provider in the UK, partnering with the UK's top networks – O2, Vodafone, EE and Three – to ensure your business stays connected with confidence.

## Connect your teams

- **Tailored mobile solutions:**  
We work to understand your business needs before creating a plan that meets them.
- **Flexible options:** Choose contracts and billing structures that fit your budget and size, from small teams to large corporations. Enjoy a single unified bill for all your services for simplified management.
- **Extensive tariff range:** Find the perfect balance of data, minutes and texts for every employee, ensuring everyone stays connected and productive.
- **Dedicated support:**  
Our knowledgeable team is readily available to offer expert advice and troubleshooting – whenever, wherever.

## Simplify mobile management

- **Mobile contracts:** We work closely with you to understand your specific requirements before tailoring a solution with a choice of mobile networks – all under a single, simple contract.
- **Mobile device management:**  
Take control of your mobile fleet remotely. Manage security policies, deploy essential applications, and remotely wipe devices if needed.

## Business Mobile and Internet of Things (IoT)

## Enhance security

- **Security features:**  
Protect valuable data with encryption, password protection and remote wipe capabilities.

## Enjoy uninterrupted connectivity

- **4G/5G mobile broadband:**  
Stay connected with a reliable backup solution for situations where your primary broadband connection experiences downtime.

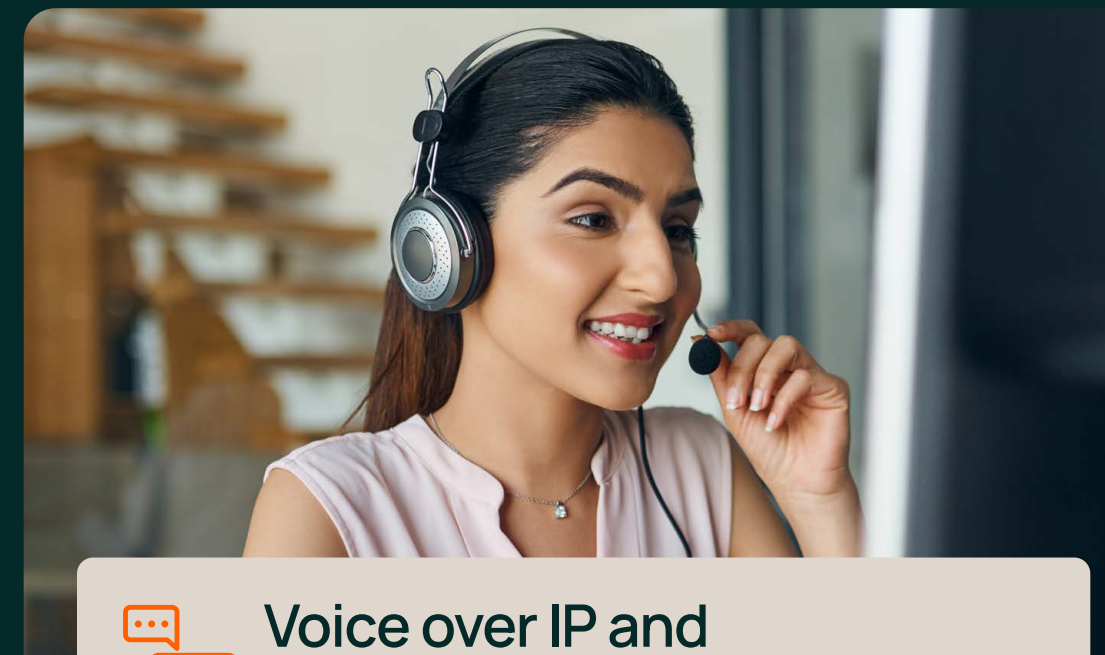

## Harness the power of IoT

- **Unlock the potential of IoT:** We offer a range of mobile data SIMs and fixed IP data SIMs to empower you to leverage the Internet of Things (IoT). Our SIMs can be used to route data to any web-connected device, providing you with control and monitoring capabilities for your IoT devices from anywhere in the world.
- **Dedicated account management:**  
Benefit from a dedicated account management team for support and expert advice.
- **Tailored solutions:** We design IoT solutions that meet the specific needs of your organisation.
- **Flexibility:** Choose from a variety of contracts with a single bill for all your services.
- **Extensive choice:** Select from a comprehensive range of mobile tariffs and plans catering to businesses of all sizes.
- **Unbeatable value:** Benefit from the best value and services from the UK's leading mobile networks.
