

## VoIP and Communications

Unify your teams and remote workers with our reliable Cloud Voice solutions.

In today's fast-paced, hybrid working environments, keeping people reliably connected whether they're at home or in the office is crucial.

We make it simple.

Our VoIP and Communications solutions provide a range of feature-rich voice and unified communications services utilising best in class VoIP (Voice over Internet Protocol) technology.

In anticipation of the PSTN switch-off, our comprehensive solutions offer your organisation a cost-effective, robust and feature-rich communications system harnessing capabilities such as:

#### Digital phoneline

An efficient replacement for your standard analogue line that delivers exceptional voice quality and streamlines your communications infrastructure. Features include a mobile app, voicemail and calling schedules.

#### Cloud voice

A cloud-based system for making and receiving calls via the internet. Empowering mobility and remote working, this solution seamlessly connects multiple sites under one system, allowing for effortless call transfers between locations. Features include voicemail to email, real time presence, chat, video calling, call recording and even call centre services.

#### SIP trunking

A flexible and scalable cloud-based alternative to ISDN, SIP trunking connects your on-premise business phone system to the telephone network through a broadband or ethernet connection.

#### Direct routing

Enjoy maximum value from your Microsoft Teams investment. Use Teams as your main phone system for inbound and outbound external calling, with inclusive advanced call management features – built on a robust and secure infrastructure, it delivers seamless call quality and a unified communications experience.

 Key features

- Inclusive free calls to UK landlines & mobiles with all Cloud Voice solutions (minimum term applies)
- Make and receive calls from anywhere in the world with an internet connection
- Manage multiple phone numbers from a single account

 Key benefits

- Save money, especially when you have high call volumes
- Reliable and secure and backed by experienced professionals
- Work from anywhere and manage calls to suit business needs
- Scalable for all business sizes
