

Metering and Data Services

**Get the basics right:
Measure it. Manage it.**

**Eliminate estimated
energy bills.**

Understanding your energy use is essential for controlling costs and meeting sustainability targets.

Our smart metering service gives you a transparent, real-time view of your consumption. You can track usage, forecast costs, and act quickly on opportunities to save energy.

This is how we do it.

Accurate energy consumption data

High-quality data underpins effective energy management. It ensures you only pay for what you use and helps you target meaningful energy, cost and carbon reductions.

Our Metering and Data Services solution gives you precise insight into your consumption to highlight opportunities to cut waste and support your net zero goals.

Zenergi offers exclusive rates for these services through our partner, Stark. Once your contract is in place, we work with your suppliers to ensure everything is set up smoothly.

Meet your metering requirements with ease

If you have a half-hourly electricity meter, you must have agreements in place with a Meter Operator (MOP), Data Collector (DC) and Data Aggregator (DA).

Through Stark, we can supply, install and manage all half-hourly metering and communications equipment, regardless of your energy supplier.

We also offer MOP/DC contracts for non-half-hourly (NHH) supplies. This prepares you for the Market-wide Half-Hourly Settlement programme, ensuring your meters are ready for the transition.

 **Metering and Data Services****Key features**

- Accurate half-hourly consumption data
- Remote data collection and validation (DC/DA)
- Smart meter upgrades for NHH supplies
- Works with any energy supplier
- Issues managed and resolved on your behalf
- Updates on meter faults and meter exchange queries
- Transparent pricing

**Key benefits**

- Clear visibility of energy usage
- Accurate bills and reporting
- Forecast future energy costs
- Identify opportunities for energy, cost and carbon reductions
- Data-driven decision making
- Easy identification of waste and consumption anomalies
- Streamlined service eliminates disruption
- Future-proof your organisation

Interested in exploring other efficiency gains?

Consider these services for complete peace of mind.

 **Non-Half-Hourly Meter Exchanges**

Soon, every organisation's electricity will need to be settled on a half-hourly basis so don't get left behind. If your meter is one of the circa 30 million affected, we can help.

[Find out more](#) **Energy Procurement**

Take control of your energy costs – with support to choose the supplier, the contract length, and type of contract that supports both your energy needs and budget.

[Find out more](#)**Enhance your operational efficiency**

With more accurate bills you can eliminate the time and hassle of processing supplier credits and rebills triggered by estimated billing.
