Commercial Property Compliance Pack

Helping property owners protect asset value, reduce risk and stay compliant.

Protecting and managing a property portfolio can be complex.

Zenergi's **Commercial Property Compliance Pack** brings together essential compliance services into one coordinated programme, helping property owners, landlords and portfolio managers reduce administrative burden, protect asset value and maintain regulatory confidence – whilst saving up to 20%.

What's included?

The **Commercial Property Compliance Pack** combines a carefully selected range of compliance services into a practical package for property owners, landlords and portfolio managers looking to manage compliance obligations and maintain building performance.

This pack includes:

- Energy Performance Certificates (EPCs)
- Minimum Energy Efficiency Standards (MEES) Support
- TM44 Air Conditioning Inspections

Save up to 20%

compared to purchasing services individually and discover how a coordinated approach can help safeguard your assets, reduce compliance risk and support long-term portfolio performance.

Protecting asset value

By combining services into one programme, property owners, landlords and portfolio managers gain better value and a simpler approach through one trusted partner.

Instead of managing multiple suppliers, assessments and compliance deadlines, you benefit from improved visibility across your property portfolio, stronger confidence in compliance obligations and greater protection against risks that could impact asset value, tenant satisfaction or operational performance.

Bundled savings

A bespoke energy package

Tailored compliance, procurement, cost and sustainability support built around your organisation.

Every organisation has different priorities, estate challenges, budget pressures and reporting requirements, and managing separate energy, compliance and sustainability services quickly becomes complex.

Our **bespoke packages** bring services together into one coordinated programme, helping organisations simplify delivery, reduce duplication and make more informed decisions, supporting cost, efficiency and sustainability goals.

What's included?

A **bespoke package** can bring together carefully selected services across our Comply, Buy, Deliver and Net Zero service areas. This means your organisation can build a package around the outcomes that matter most – from meeting regulatory obligations, to simplifying utility management, improving energy performance or progressing towards carbon reduction targets.

- Compliance-led support with value
- Energy procurement services
- Operational efficiency & energy optimisation
- Sustainability & net zero support
