# Energy Insight Pack

Helping organisations improve cost control, strengthen billing accuracy and gain greater visibility of energy consumption.

Accurate data is essential for effective energy management, yet many organisations struggle with billing inaccuracies, poor energy visibility and rising cost pressures.

Zenergi's **Energy Insight Pack** combines key services to improve billing accuracy, strengthen energy insight and offer savings of up to 20% compared with buying services separately – regardless of whether Zenergi manages your energy contract.

## What's included?

The Energy Insight Pack combines the following carefully selected services that provide the data, validation and insight needed to make more informed energy decisions. Together, they deliver greater confidence in energy data whilst reducing the administrative burden associated with energy management.

## This pack includes:

- Bill Validation
- Metering & Data Services
- Market-wide Half-Hourly Settlement (MHHS) Support

## Save up to 20%

compared to purchasing services individually and discover how a coordinated approach can improve billing accuracy, strengthen energy visibility and support better operational and financial decision-making.

## More than energy data

By combining services into one programme, organisations gain greater value and a simpler, more streamlined approach through one trusted partner.

The result is more reliable energy data, improved billing accuracy and clearer insight into energy use, enabling informed decisions while reducing internal administration.

# A bespoke energy package

Tailored compliance, procurement, cost and sustainability support built around your organisation.

Every organisation has different priorities, estate challenges, budget pressures and reporting requirements, and managing separate energy, compliance and sustainability services quickly becomes complex.

Our **bespoke packages** bring services together into one coordinated programme, helping organisations simplify delivery, reduce duplication and make more informed decisions, supporting cost, efficiency and sustainability goals.

Save up to  
**20%**

## What's included?

A **bespoke package** can bring together carefully selected services across our Comply, Buy, Deliver and Net Zero service areas. This means your organisation can build a package around the outcomes that matter most – from meeting regulatory obligations, to simplifying utility management, improving energy performance or progressing towards carbon reduction targets.

- Compliance-led support with value
- Energy procurement services
- Operational efficiency & energy optimisation
- Sustainability & net zero support

## Save up to 20%

Speak to our specialists for a tailored quotation and discover how a coordinated approach can help your organisation save time, reduce costs and improve efficiency.

## Built around your needs

A bespoke package gives your organisation the flexibility to choose services that match your priorities and adapt as needs change.

Whether your focus is compliance, utility management, operational improvement or sustainability, we can build a package that supports your needs today and evolves over time.
