*Prices can vary and are dependent on estate size, number of sites, number of services, service scope and specified requirements.

Bundled savings

A bespoke energy package

Tailored compliance, procurement, cost and sustainability support built around your organisation.

Every organisation has different priorities, estate challenges, budget pressures and reporting requirements, and managing separate energy, compliance and sustainability services quickly becomes complex.

Our **bespoke packages** bring services together into one coordinated programme, helping organisations simplify delivery, reduce duplication and make more informed decisions, supporting cost, efficiency and sustainability goals.

20%

What's included?

A **bespoke package** can bring together carefully selected services across our Comply, Buy, Deliver and Net Zero service areas. This means your organisation can build a package around the outcomes that matter most – from meeting regulatory obligations, to simplifying utility management, improving energy performance or progressing towards carbon reduction targets.

- Compliance-led support with value
- Energy procurement services
- Operational efficiency & energy optimisation
- Sustainability & net zero support

Built around your needs

A bespoke package gives your organisation the flexibility to choose services that match your priorities and adapt as needs change.

Whether your focus is compliance, utility management, operational improvement or sustainability, we can build a package that supports your needs today and evolves over time.
