

Metering and Data Services

Energy data that puts you
in control: Measure it.
Manage it. Eliminate
estimated bills.

Understanding your energy use is essential for controlling costs and meeting sustainability targets.

Our smart metering service gives you a transparent, real-time view of your consumption. You can track usage, forecast costs, and act quickly on opportunities to save energy.

This is how we do it.

Accurate energy consumption data

Our Metering and Data Services solution gives you precise insight into your energy consumption to ensure you only pay for what you use and can target meaningful energy, cost and carbon reductions.

Zenergi offers exclusive rates for these services through our approved partners. Once your contract is in place, we work with your suppliers to ensure everything is set up smoothly.

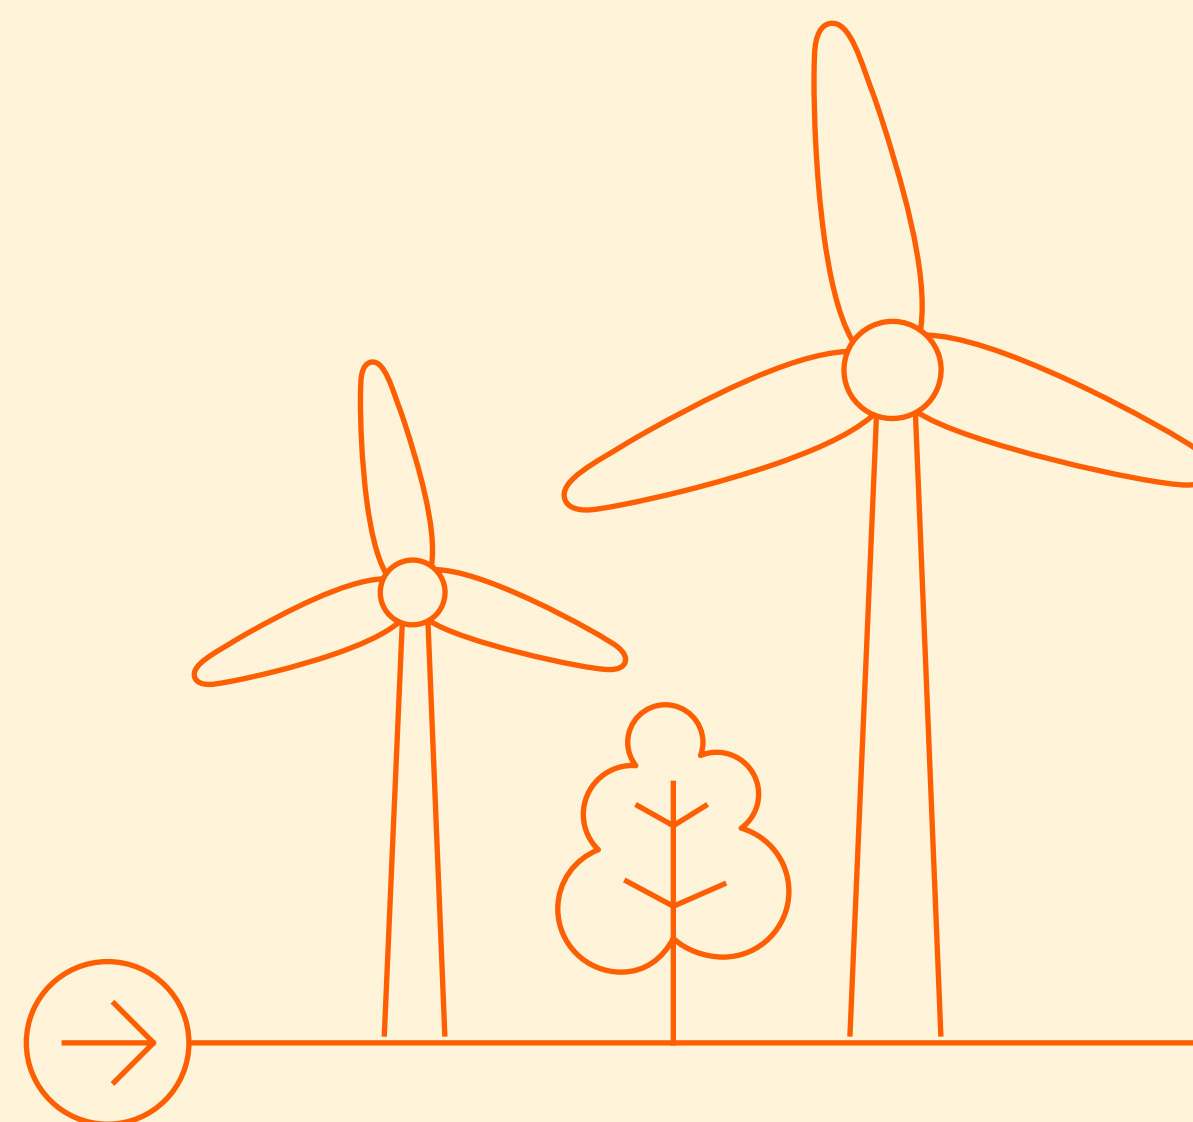

Meet your metering requirements with ease

If you have a half-hourly electricity meter, you must have agreements in place with a Meter Operator (MOP), Data Collector (DC) and Data Aggregator (DA).

We can supply, install and manage all half-hourly metering and communications equipment, regardless of your energy supplier. By mid-2027, all electricity meters will be settled on a half-hourly basis due to the Market-wide Half-Hourly Settlement (MHHS) programme.

MHHS is part of the UK's plan to modernise its energy market and support sustainability goals. By measuring energy usage more accurately, the system will be better equipped to integrate renewable energy, reduce waste and improve grid management.

To support the transition, we also offer MOP/DC contracts for non-half-hourly (NHH) supplies, ensuring your meters are MHHS ready.

 Metering and Data Services

You're in control with enhanced reporting tools

Integration with the Zenergi Portal means you'll access granular data when you need it, how you need it. Because you can't manage it if you can't monitor it.

A user-friendly interface makes it easy to view, filter and export data in PowerPoint, CSV or PDF to share in a format that works for you and your stakeholders.

Managing multiple sites has never easier. Gain a consolidated view of all your meter consumption, and assign user-specific permissions, helping you maintain control while keeping your team connected.

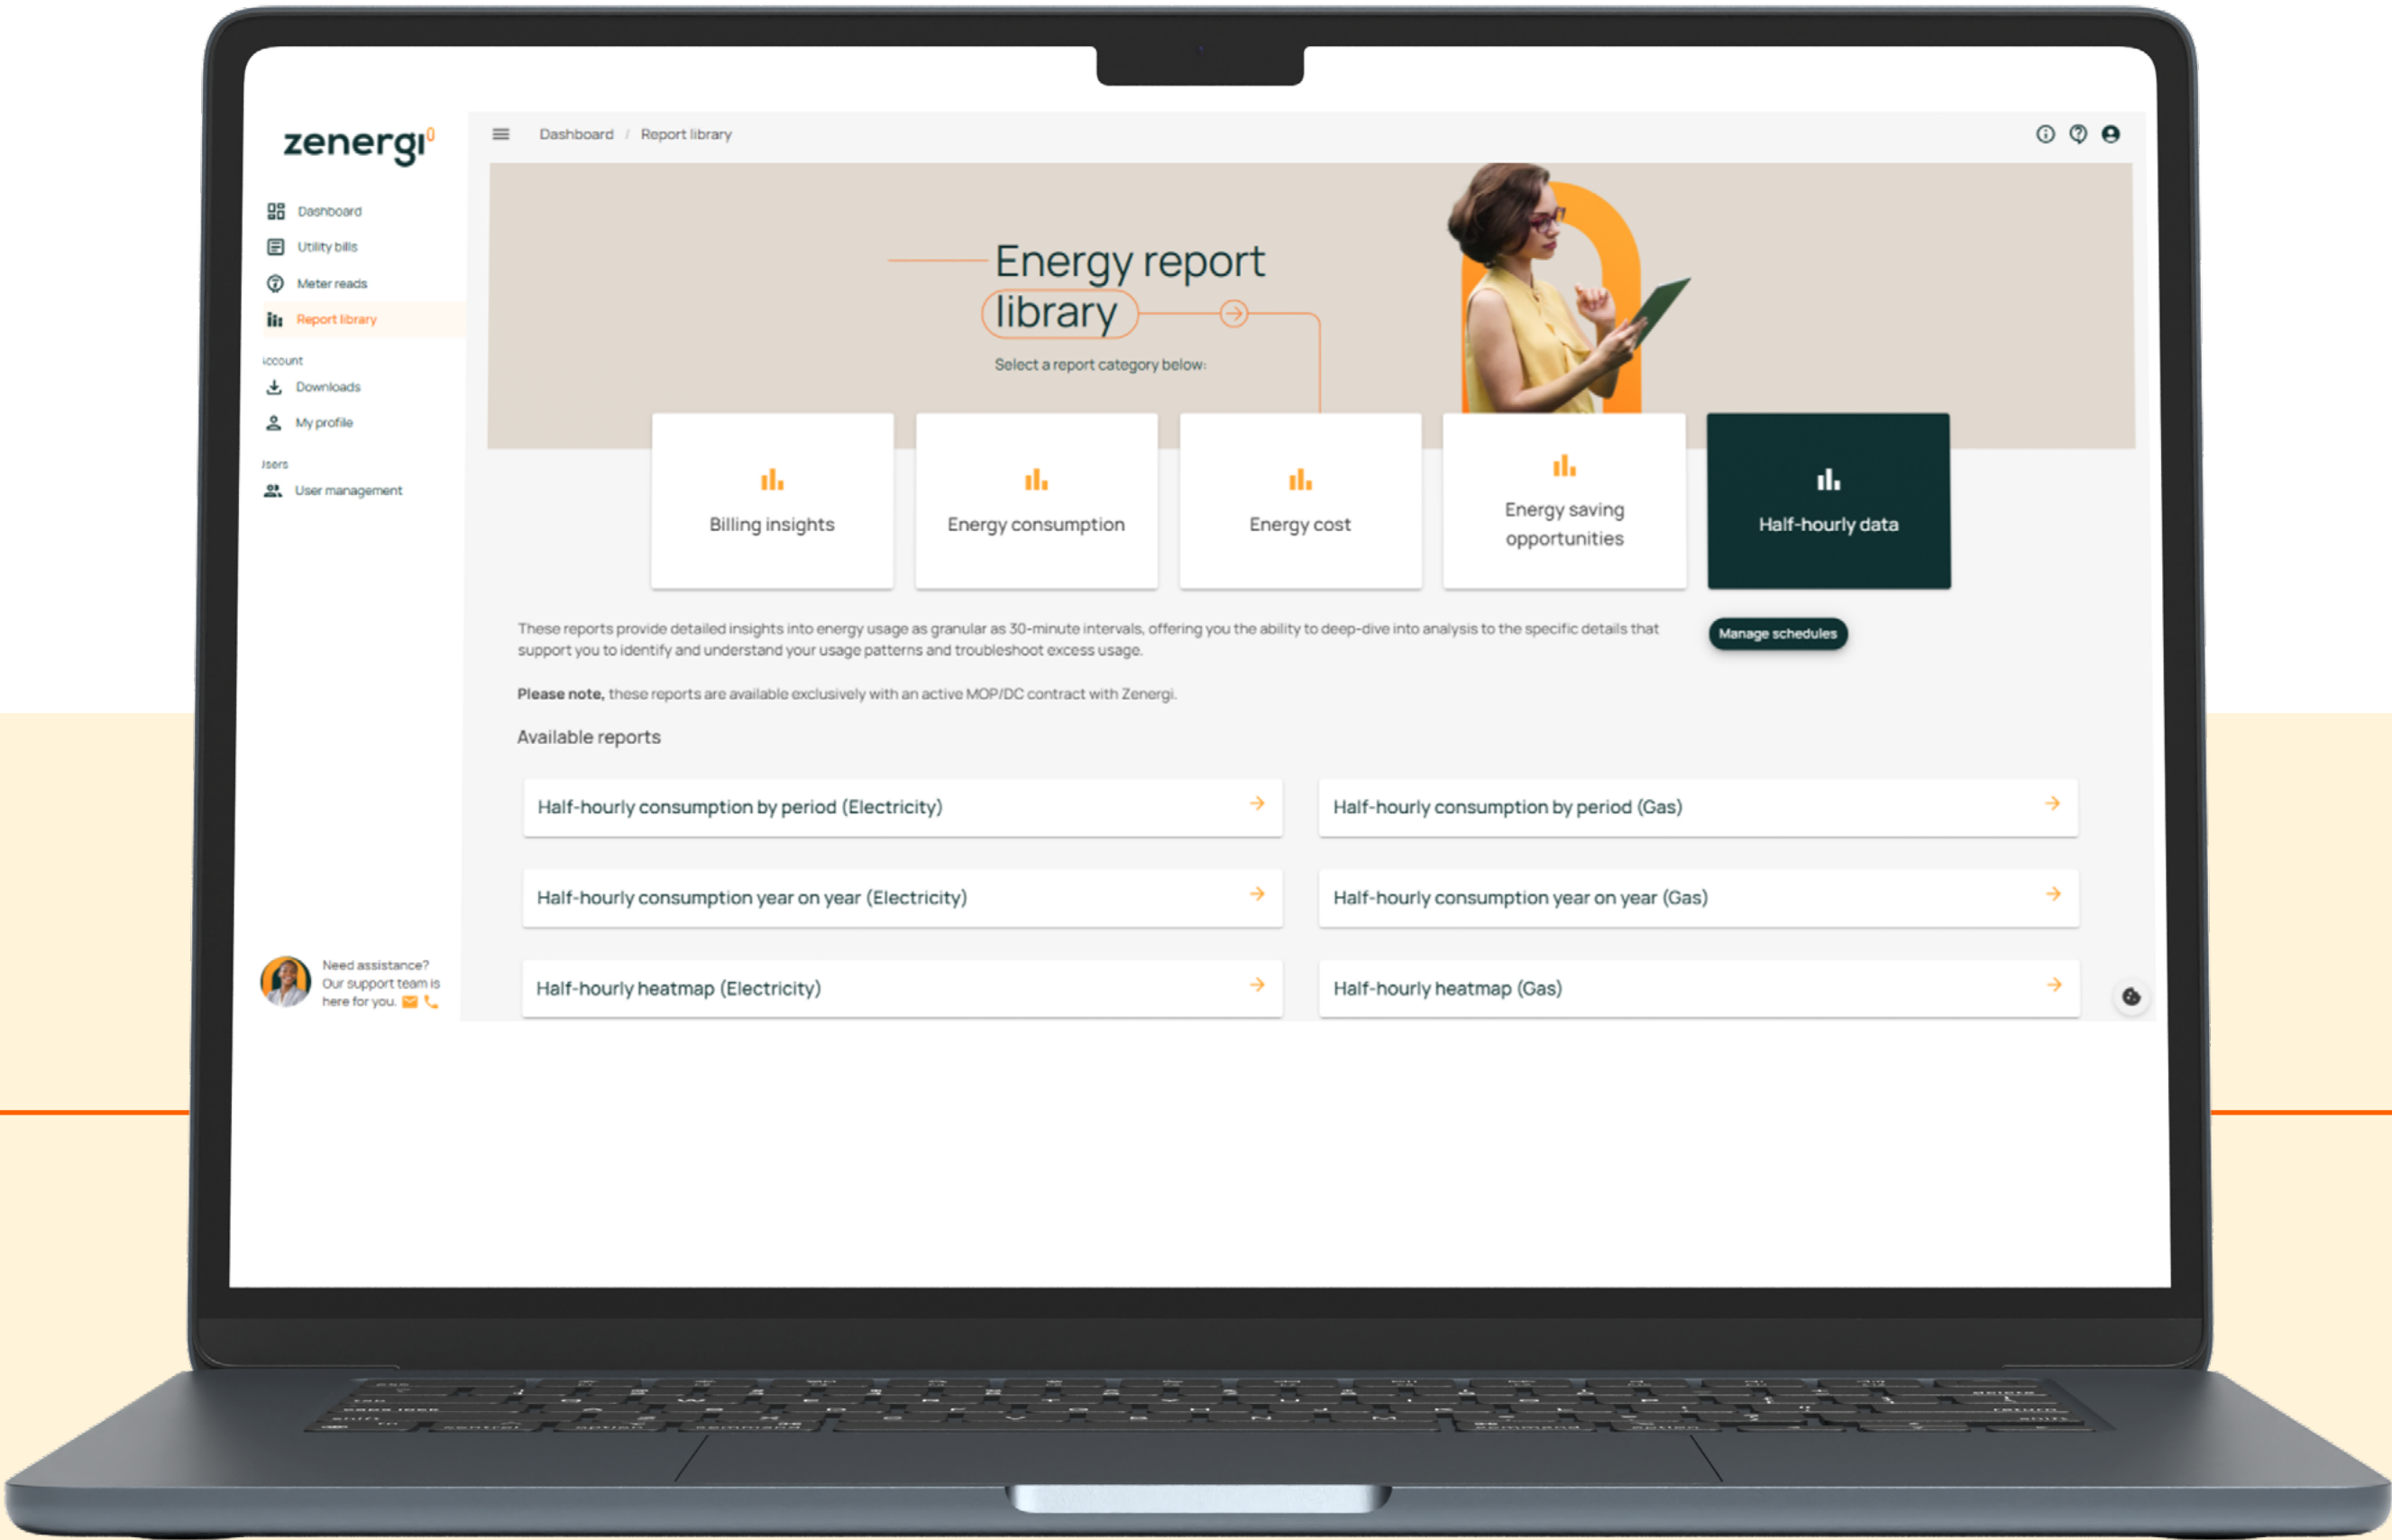

Portal features

Comprehensive report library with eight bespoke reports:

- Data export options to PowerPoint, CSV and/or PDF
- A centralised file hub for easy document retrieval
- Granular user permissions and easy account switching
- Enhanced security with two-factor authentication

Portal Benefits

- Instant bill viewing with no download required
- Save reports based on your own set filters
- Schedule reports to receive them when you need them
- Fast performance for viewing, filtering and downloading data

 Metering and Data Services

 Key features

- Accurate half-hourly consumption data
- Remote data collection and validation (DC/DA)
- Smart meter upgrades for NHH supplies
- Works with any energy supplier
- Issues managed and resolved on your behalf
- Updates on meter faults and meter exchange queries
- Transparent pricing

 Key benefits

- Clear visibility of energy usage
- Accurate bills and reporting
- Forecast future energy costs
- Identify opportunities for energy, cost and carbon reductions
- Data-driven decision making
- Easy identification of waste and consumption anomalies
- Streamlined service eliminates disruption
- Future-proof your organisation

Enhance your operational efficiency
With more accurate bills you can eliminate the time and hassle of processing supplier credits and rebills triggered by estimated billing.

Interested in exploring other efficiency gains?
Consider these services for complete peace of mind.

 **Bill Validation**

Identifying discrepancies in energy and water bills, ensuring the numbers are accurate and the correct rates are being applied. Any discrepancies are queried with suppliers and resolved with incorrect payments returned in full for complete peace of mind.

 **Energy Procurement**

Take control of your energy costs – with support to choose the supplier, the contract length, and type of contract that supports both your energy needs and budget.
