

Dynamic Marketplace

Get the best value from your energy supply contracts and stay ahead in a rapidly changing market.

Dynamic Marketplace

Navigating energy procurement can be complex in a market that's constantly changing.

Expand your renewal options with a compliant route to market that evolves alongside market conditions. You'll gain greater choice, flexibility and confidence in every procurement decision.

This is how we do it.

What is a dynamic marketplace (DMP)?

A Dynamic Marketplace (DMP) is a compliant way to procure future energy contracts. It provides access to a wider pool of suppliers through a flexible, continuously updated supplier list. Unlike static frameworks, a DMP adapts to market changes, allowing new suppliers to join as they emerge. Some suppliers can also offer renewable matching products, potentially saving clients up to £50,000 per year.

Why is it important?

Public sector organisations spending more than £207,000 on energy contracts must comply with the Procurement Act 2023. This means procurement must be carried out via one of the following routes: a dynamic marketplace (DMP), a framework agreement, or a direct tender process.

Why choose a DMP?

While Zenergi have historically operated frameworks, the evolving energy market, particularly in electricity, makes a DMP a compelling alternative.

- **Expanding supplier base:** New suppliers can join at any time provided they meet requirements
- **Market adaptability:** Changes such as Market-wide Half-Hourly Settlement are reshaping supplier offerings
- **More renewable options:** Enjoy greater choice of sustainable energy solutions
- **Customisation:** You can include your own evaluation criteria
- **Wider competition:** Gain access to additional suppliers not currently available through existing frameworks

A Dynamic Marketplace is an evergreen, compliant solution for ongoing energy procurement.

Dynamic Marketplace

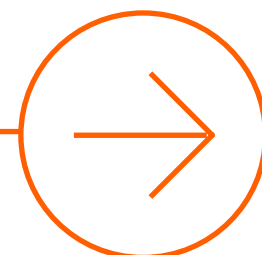

Compliance assurance:

Our solution has been thoroughly reviewed with legal specialists in public procurement and with public sector procurement consultants.

How does the process work?

We manage the administration on your behalf using the Delta platform and provide all notices to the Central Digital platform. This ensures a competitive supplier field while you continue working with your usual Procurement Consultant. The result is a streamlined hassle-free route to market.

zenergi⁰

Timeline: Typically completed within four weeks

Process steps:

Approval: You approve Zenergi to administer the DMP. We provide indicative pricing, fees, and service details to support your decision.

DMP agreement: You formally commit to using the DMP via a contract with Zenergi.

Tailored requirements: You define any specific terms or criteria suppliers must meet.

Supplier selection: We present a full analysis of approved suppliers, including pricing and contract options.

Contract award: You select your preferred supplier and sign the contract as usual.

Ongoing management: We continuously onboard and approve new suppliers for future procurements.

Termination: The DMP process remains in place as long as you use Zenergi, with standard termination periods applying as stipulated in our T&Cs.

Dynamic Marketplace

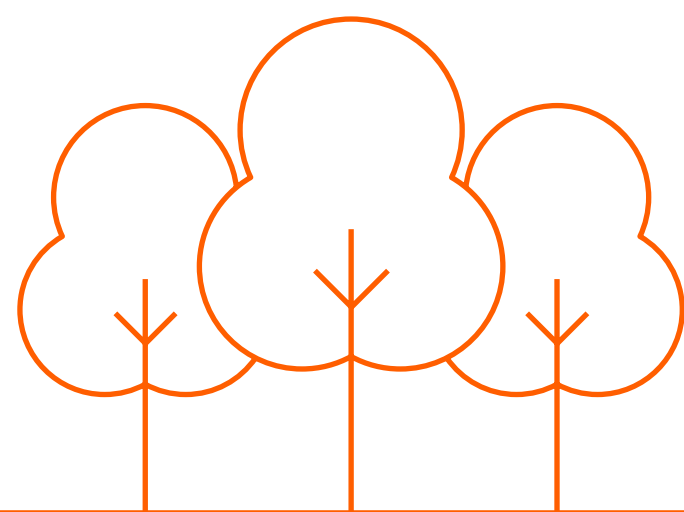

Key features

- Compliant with the Procurement Act 2023
- Wider pool of suppliers than traditional frameworks
- New suppliers can join at any time
- Solution approved by legal specialists and public sector procurement consultants

Key benefits

- Helps secure best value from energy supply contracts
- Achieve savings through renewable matching products
- Adapts to market changes and new entrants
- Reduced administrative burden
