

Positive Energy Pack Interactive (PEPI):

Improve your consumption monitoring and budgeting

Our complimentary customer portal, the Positive Energy Pack Interactive (PEPI), delivers high quality validated energy and water data that helps to drive energy and carbon savings. While the responsibility of organisations to reduce their carbon footprint has never been greater, our easy-to-use system offers granular visibility into energy and water consumption to support with monitoring, managing, and reducing energy use to support with accurate budgeting; understanding of consumption patterns; and energy compliance.

Forecasting and budgets: Observe your organisation's cost and consumption data for gas, electricity and water

The PEPI allows you to compare your actual spend and consumption compared to profiled expectations we set at the beginning of your contract. You can define the observation period and drill into the detail on an organisation level, or down to a specific meter point(s). The ability to compare year-on-year trends helps you to forward predict your expenditure in an informed and simple manner.

Half-hourly consumption data

Our data is regularly uploaded to the portal for customers utilising our data collection package. Accessing half-hourly data means the usage trends at your site(s) can be compared to expectations, and any identified areas of overconsumption can be investigated.

Energy market data

The latest market movements are available to view on a daily basis to help with an understanding of trends within the marketplace. The ability to analyse historical trends as well as to directly compare wholesale price movements across 12, 24 and 36 month terms, supports your decision making.

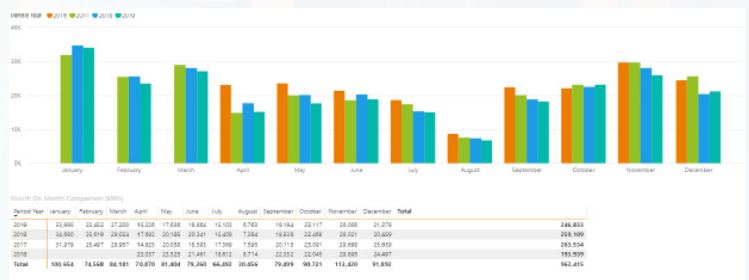

Meter readings

Customers can upload meter readings directly into the system and also add a photo of the meter. This functionality allows customers to review previous billed readings and ensures that the meter reading is verified at the point of submission, with a notification prompt displayed if any reading doesn't follow correctly.

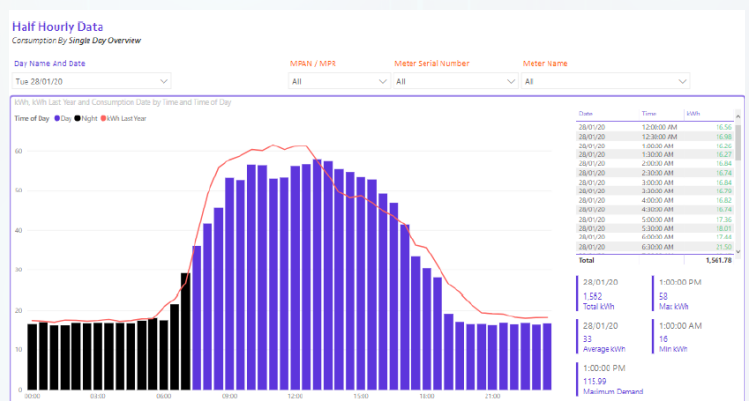

Account management and comments

While customer access is available at any time to key data and analysis, PEPI also offers monthly reporting and commentary from your Relationship Manager, providing observations and recommendations.

Report suite comprising usage or cost comparisons month-by-month, year-by-year

Half-hourly data analysis undertaken to help you troubleshoot anomalies

In addition to the pre-populated reports offered as standard to all clients in PEPI, we also offer clients the opportunity to invest in bespoke reporting via our Eco-Hub product.

Contact us to find out more about a bespoke reporting package.
