Penwortham Girls' High School:

Protecting
school energy
budgets and
freeing up
staff time

Penwortham Girls' High School in Lancashire is a non-fee paying school with a long-standing reputation for academic success.

How Zenergi supports Penwortham Girls' High School

Penwortham Girls' High School was seeking an energy partner who would manage the school's energy procurement, while supporting accurate budget forecasting.

Zenergi was able to deliver a fully OJEU-compliant procurement service for the school's gas and electricity, with a fixed contract that helps to provide budget certainty and supports the school's accounting processes.

The full contract management service for Penwortham Girls' High School includes a dedicated Relationship Manager who takes care of any day-to-day queries and provides an easily accessible point of contact. Invoice validation ensures that the school's energy bills are checked for accuracy ahead of payment, with any queries managed by experienced energy consultants through to resolution. The service has helped with early identification of supplier errors, ensuring that the school is only paying for the energy used.

Looking ahead, the school is considering opportunities offered through Zenergi's technical services division in order to improve energy efficiency around the school, and further minimise the school's spend on energy.

Client Comment

“Having Zenergi's knowledgeable team take care of the complicated issue of budgeting and monitoring our energy consumption is so much more time-effective than us doing it internally. They also keep us informed of what's happening in the market and any opportunities that could benefit the school.”

Andrea Barnes
Business Manager, Penwortham Girls' High School
